

## **CM position in Denver**

"We are looking for a few good men!" We are interested in a CM graduate, or related degree, with 5 to 10 years of construction experience. The work involves claims analysis, but also estimating and scheduling, and analysis of the cost to remediate defective construction. We have an excellent compensation and benefits package, as well as ownership opportunities over the long term. Anyone interested in finding out more about our company can access our web site at [www.demandinc.com](http://www.demandinc.com). They can also email or call me at the addresses noted below.

Thanks for any leads you can send our way.
